

HALDRUP GCP-30

Grain counter and filling machine

The HALDRUP GCP-30 Grain counter and filling machine counts seeds with the high precision and at high speed. The number of bags that the seeds are packed into can be set individually.

Many individual adjustment options ensure that small seeds, such as canola, can be counted just as well as large seeds, such as maize.

The user-friendly touchscreen can be used to save multiple individual recipes for each type of crop, which allows you to have the right recipe for each individual crop type and size. This ensures that counting and filling will be done at optimum precision and high speed.
